

BIO-key adds Cyber Threat Intelligence Services, Cyberlitica to Channel Alliance Partner Program, Helping Customers Address Core Aspects of a Holistic Cybersecurity Program

WALL, N.J., November 9, 2021 – [BIO-key International, Inc. \(NASDAQ: BKYI\)](#), an innovative provider of Identity and Access Management (IAM) and Identity-Bound Biometric (IBB) solutions, today announced the addition of [Cyberlitica](#), a provider of advanced cyber threat intelligence services for the enterprise, government, and consumer markets, as the most recent addition to their [Channel Alliance Partner \(CAP\) Program](#).

Organizations looking to prevent cyberattacks and the damage they cause are in search of technologies that can support their cybersecurity programs. As the National Institute for Standards and Technology or [NIST framework](#) outlines, there are five functions of a successful cybersecurity program – Identify, Protect, Detect, Respond, and Recover. The addition of Cyberlitica as a member of the BIO-key CAP program is focused on helping customers address these core aspects as they develop a holistic approach to cybersecurity.

Cyberlitica offers a comprehensive suite of products and services available to combat cyber-warfare, account takeover, and fraud, faced by individuals and companies alike. While BIO-key's award-winning IAM [and authentication] platform, PortalGuard, reduces password-related IT support calls by up to 95%; eliminates passwords; secures remote access; prevents phishing attacks; meets cyber insurance requirements; and improves productivity for the customer's IT team. PortalGuard offers flexible options for single sign-on, self-service password reset, and 16 multi-factor authentication methods. PortalGuard is the only IAM platform to offer Identity-Bound Biometrics, available on-premises or in the cloud, as a service (IDaaS).

"Because of the many high-profile companies and government agencies that we work with, Cyberlitica chooses its partners very carefully with a vetting process that's one of the strictest in the industry," said Bob Schiff, Founder and CEO, Cyberlitica. "That's why we chose BIO-key as our 'Best of Breed' partner for authentication. We know they have the products and services that our clients want and will service them with the support that each client needs to be successful in a very unpredictable world."

"Customers need multiple, interoperable solutions to solve their cybersecurity challenges," said Fred Corsentino, CRO, BIO-key. "We look forward to working together with Cyberlitica to help customers improve their security posture, prevent cyberattacks, and solve their identity and access management challenges."

Cyberlitica offers threat intelligence solutions to employers and organizations of all sizes and across all industries. It provides Dark Web audit and monitoring services, Domain Intelligence Services identifying risk from where it

originates...The Dark Web. It delivers 24x7x365 Dark Web monitoring and notification services, as well as the most cutting-edge insights, professional services, and customized training solutions that significantly mitigate risk.

BIO-key Safe Harbor Statement

All statements contained in this press release other than statements of historical facts are "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 (the "Act"). The words "estimate," "project," "intends," "expects," "anticipates," "believes," and similar expressions are intended to identify forward-looking statements. Such forward-looking statements are made based on management's beliefs, as well as assumptions made by, and information currently available to, management pursuant to the "safe harbor" provisions of the Act. These statements are not guarantees of future performance or events and are subject to risks and uncertainties that may cause actual results to differ materially from those included within or implied by such forward-looking statements. These risks and uncertainties include, without limitation, our history of losses and limited revenue; our ability to raise additional capital; our ability to protect our intellectual property; changes in business conditions; changes in our sales strategy and product development plans; changes in the marketplace; continued services of our executive management team; security breaches; competition in the biometric technology industry; market acceptance of biometric products generally and our products under development; the duration and severity of the current coronavirus COVID-19 pandemic and its effect on our business operations, sales cycles, personnel, and the geographic markets in which we operate; delays in the development of products and statements of assumption underlying any of the foregoing as well as other factors set forth under the caption see "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2020 and other filings with the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date made. Except as required by law, the Company undertakes no obligation to disclose any revision to these forward-looking statements whether as a result of new information, future events, or otherwise. Additionally, there may be other factors of which the Company is not currently aware that may affect matters discussed in forward-looking statements and may also cause actual results to differ materially from those discussed. In particular, the consequences of the coronavirus outbreak to economic conditions and the industry in general and the financial position and operating results of our Company, in particular, have been material, are changing rapidly, and cannot be predicted.
